

Question 1:

Design the following lists:

a-

Aircraft Types

- I. General Aviation (piston-driven engines)
 - A. Single-Engine Aircraft
 - 1. Tail wheel
 - 2. Tricycle
 - B. Dual-Engine Aircraft
 - 1. Wing-mounted engines
 - 2. Push-pull fuselage-mounted engines
- II. Commercial Aviation (jet engines)
 - A. Dual-Engine
 - 1. Wing-mounted engines
 - 2. Fuselage-mounted engines
 - B. Tri-Engine
 - 1. Third engine in vertical stabilizer
 - 2. Third engine in fuselage

b-

Mixed Lists

- 1. top level item - 1
- 2. top level item - 2
- 3. top level item - 3
 - 1. second level item - 3.1
 - 2. second level item - 3.2
 - 3. second level item - 3.3
 - third level item - 3.3.1
 - third level item - 3.3.2
 - third level item - 3.3.3
 - 1. fourth level item - 3.3.3.1
 - 2. fourth level item - 3.3.3.2
 - third level item - 3.3.4
 - fourth level item - 3.3.4.1, showing you a definition list:
 - dweeb
 - young excitable person who may mature into a *Nerd* or *Geek*
 - hacker
 - a clever programmer
 - nerd
 - technically bright but socially inept person
 - Center
 - Centre
 - A point equidistant from all points on the surface of a sphere.
 - In some field sports, the player who holds the middle position on the field, court, or forward line.

Question 2:

- a. Design a form similar to the following one. Data should be sent in the same time to two email addresses with subject “stolen data “. Choose the appropriate method and encoding and suggest if there is any conflict.

HTML Forms

Demonstrates creating HTML Form with Grouping

Personal Information

Name:

Password:

Gender: ☒ Male ☐ Female

Upload Your Personal Photo: No file chosen

Economic Data

Vehicle Type: ☐ Bike ☒ Car ☐ SUV ☐ Cycle

Countries:

Companies:

Residence Data

Address:

- b. Design a form similar to the following one taking the following into consideration:
- 1- Any needed Image that is not attached take it as image selection from the page and save it as an image.
 - 2- The form data should be sent to the file “any.php” that is located on server called” www.any.com” under folder called “phpfiles”
 - 3- Take care of the elements that are displayed with initial values.
 - 4- Choose the appropriate method and encoding.
 - 5- In another instance of the form disable the elements that can be disabled
 - 6- In another instance of the form convert the elements that can be converted to be read-only

Syntax: ☒ INSERT ☒ SELECT ☒ UPDATE ☒ DELETE

Table:

Form Action:

Field 1:

Field 2:

Field 3:

Please enter values here (one line per option)

Field 4:

Please enter values here (one line per option)

Field 5:

Please enter values here (one line per option)

Field 6:

Field 7:

Field 8:

Field 9:

Field 10:

Question 3:

Try to design webpage similar to the following one using the tools that you learned in the class. The needed images are included in attached folder. Consider that there is main folder called mywebsite contains three folder called htmlpages, phppages, and images. The next page is located inside htmlpages and the images are located inside the images folder. The form data should be submitted to file called actionpage.php that is located insides the folder phppages. Concerning the video file insert one from your choise. You can if you want to use tables to divide the page taking into consideration the wepage apperance. The links in the page are accepted to be undelined.
