 Will be reviewed

8

Image processing is a method of performing operations on images to extract meaningful information from them.

☒ True

☐ False

 Will be reviewed

9

The spatial resolution of an image depends on the number of pixels it contains.

☒ True

☐ False

 Will be reviewed

10

Each pixel in a **monochrome** image contains **three** values.

☐ True

☒ False

 Will be reviewed

11

If A and B are grayscale images of the same size, `imsubtract(A, B)` function in MATLAB subtracts A from B pixel by pixel.

☒ True

☐ False

 Will be reviewed

12

If we subtract a scalar value of 230 from an 8-bit image and then add the same value back, the original image will be recovered.

☐ True

☒ False

 **Will be reviewed**

13

Binarization is the process of reducing the number of gray levels in a grayscale image to two levels.

☒ True

☐ False

 **Will be reviewed**

14

If you want to get the detailed information about an image (like dimensions, format, etc.) without displaying the image itself, which MATLAB function should you use?

Note: Type only the function name, without any spaces.

iminfo **imfinfo**

 **Will be reviewed**

15

Given two 8-bit grayscale images x and y that are added pixel by pixel. What will be the resulting pixel value at the position (2,2) after the **normalized addition**?

Note: Type only the value, without any spaces.

129

 **Will be reviewed**

16

How many intensity levels are present in a 16-bit grayscale image?

Note: Type only the value, without any spaces.

$$2^{16}$$

65536

 **Will be reviewed**

17

In a double-type image with pixel values normalized between [0,1], what will be the NOT operation result for a pixel value of 0.8?

Note: Type only the value, without any spaces.

0.2 $(1 - 0.8) = 0.2$

 **Will be reviewed**

18

Which of the following is NOT an application of image processing?

- ☐ Face Recognition
- ☐ Medical Imaging
- ☒ Text Editing
- ☐ Robotics & Autonomous Vehicles

 **Will be reviewed**

When we subtract two identical images in image processing, we obtain a

- ☒ Black image
- ☐ White image
- ☐ Darker image
- ☐ Brighter image

$$A - A = 0$$

 **Will be reviewed**

20

When we multiply an image by a value greater than 1,

- ☐ The image becomes darker
- ☒ The image becomes brighter
- ☐ The image remains unchanged
- ☐ None of these

 **Will be reviewed**

21

Which of the following statements has the same effect as imdivide(A, 2) ?

- ☐ immultiply(A, 2)
- ☒ immultiply(A, 0.5)

Division by 2 = multiplication by 0.5.

- ☐ imdivide(A, 0.5)
- ☐ None of the these

 **Will be reviewed**

22

What is the expected result of performing a bitwise OR operation between an 8-bit grayscale image and its 8-bit binary mask?

- ☒ The regions where the mask is white turn completely white, while other regions remain unchanged
- ☐ The regions where the mask is white remain unchanged, while other regions turn completely white
- ☐ The regions where the mask is white remain unchanged, while other regions turn completely black
- ☐ None of the these
